Hiring Manager

Xbox Digital Engagement (DE)

Microsoft Corporation

Redmond, WA

Subject: Application for Digital Designer (Contract) – Xbox Digital Engagement

Dear Hiring Manager,

As a versatile digital creator with a software engineering foundation (5+ years) and passion for gaming, I'm excited to apply for the Digital Designer role at Xbox DE. My hybrid skills in design systems, UI/UX, and front-end development (React, JavaScript, SCSS) align perfectly with crafting immersive digital experiences for players.

Why my background fits:

Built responsive interfaces for web/mobile apps (McHolmes Tech, Cinfores) using modern stacks like React + Node.js, with keen attention to visual polish.

Led CMS-driven designs (WordPress, Webflow) for Chris Designx Academy, increasing engagement by 50% through intuitive UI and branded assets.

Technical + creative workflow: As a full-stack developer who also designs, I bridge gaps between engineering and design teams—ideal for Xbox's hybrid work model.

What excites me most is the chance to merge my technical precision with player-first creativity for Xbox's global community. I'd love to discuss how I can contribute—let's connect!

Best regards,

Chris Nyeche
